

DNA/RNA  
extractions products

## Xtralyz®

The DNA extraction chip. Our consumable that engages a large volume of sample before extracting DNA and RNA from all organisms trapped in it, even with complex matrices. Provides efficient mechanical lysis without sample dilution or hazardous chemicals.

## The Grinder

To perform the lysis and manage the fluids, the Grinder is a portable system ensuring an easy use of the Xtralyz®.

Designed to ensure the proper lysis execution, it is also equipped with a waste container.

## Direct'HD

An automatic system to process a large number of Xtralyz®. Automatically performs the lysis and wash step. Dedicated to users with a high daily test flow.
